# Css

Grid layout

Properties

Part -2

CSS

Grid Template Areas

Grid template area makes a visual representation of the grid using both columns and rows. This makes for a faster design process

Grid Auto Rows

Sets a size for the rows in a grid container. This property affects only rows with the size not set

Grid Auto Columns

Sets a size for the "columns" in a grid container. This property affects only columns with the size not set

Grid Column

Specifies a grid item's size and location within a grid column by contributing a line, a span, or nothing (automatic) to its grid placement, thereby specifying the inline-start and inline-end edge of its grid area

1		2
3	4	5

Grid Row

Specifies a grid item's size and location within the "grid row" by contributing a line, a span, or nothing (automatic) to its grid placement
