Next →

Download

Its Used when you want your user to **Download The Link** Instead of navigating to the file.

```html
<a href="logo.png" download>
```
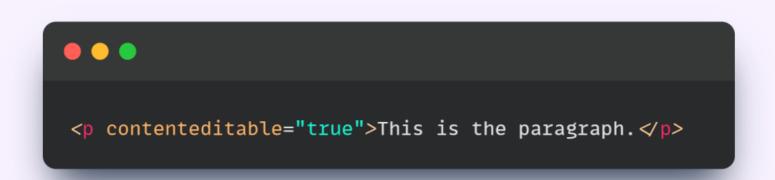

Next ➡

Tooltip

With the **title attribute**, you can easily add a tooltip to provide extra information for your user.

```
<p title="like">Post</p>
```

Next ➡

Content Editable

You can make any content editable by setting the contenteditable attribute to true.

```html
<p contenteditable="true">This is the paragraph.</p>
```

Next ➡️

Text-Direction

With dir="Auto", the browser will change the text alignment as per the language of the content.

```
<p dir="auto">This is the my new text.</p>
```

NEXT ➡️

Basic Accordion

Wrap your accordion element with details element and for the title use the summary element. and P Tag for main content.

```html
<details>
  <summary>About Lorem Ipsum</summary>
  <p>Lorem Ipsum is a simply dummy test of the printing and
      typesettig industry. Lorem Ipsum has been the industry
      standard
  </p>
</details>
```

Next ➡️

Best Of Luck :)
